Each kit takes ~ 1ft of extrusion accounting for some scrap. I'm not sure what the demand for the kit is though, it's for a replacement for the D412-742-018 kit.

LOL I was JUST about to send you an e-mail about this. It turns out that because we switched to 2024 we don't need a new drawing; M2024T3A Rev. A already allows for unequal leg lengths, and can be used for this part. Only this morning I realized that I hadn't sent anyone that info yet, so we didn't have a P/N to order that part against.

Kim, can you please create the part number below in intuitive so that we can order it?

M2024T3A1.25X1.50X0.125X0.156 "2024-T3 ANGLE H1.25 x W1.50 x T0.125 x R0.156 (AND10134-1407)"

Is there anything else needed for this part?
